Experience

StellarByte

January 2024 –

FrontEnd Developer

Gurugram, Haryana

- Led the execution of a **pixel-perfect** landing page from inception to delivery for the first client project, demonstrating strong proficiency in **Next.js** and attention to detail in **meeting client specifications**.
- Spearheaded comprehensive **UI testing** initiatives for the second client project, ensuring optimal functionality and user experience across various devices and screen sizes.
- Working closely with designers and other team members to translate client requirements into tangible front-end solutions, fostering effective communication and project alignment.

Skilzen

May 2023 – August 2023

Front End Engineer Intern

Bangalore, Karnataka

- Worked on **College Mentor** - a platform being **built for students choosing colleges and courses**.
- Learned and worked with Directus(Headless CMS) to handle all the blog content of the platform.
- Developed a feature through which the **blogs can be easily shared** on Social Media platforms(Twitter, LinkedIn, Facebook) with a **simple click**.
- Implemented **Open Graph Protocol** to **increase social media shareability** of the blogs when being shared on different platforms.
- Integrated **Directus API** with **SendGrid** for **Email automation**.

Projects

FormBuild | Live | *NextJS, Prisma, PostgreSQL, Zod, TailwindCSS*

- Developed a Form building application using which **users can create as many forms** as they want.
- There is also a **preview feature** using which the user can actually see the form before publishing it.
- Forms can be **published** and **shared with anyone** along with which the responses can also be recorded.
- Responses can be **tracked** by seeing the **total visits, total submissions, bouncing, and submission rate**.

SpaceX Web App | Live | *ReactJS, TailwindCSS, SpaceX API*

- Created a SpaceX website that displays information about their launches, crew, rockets, etc.
- Implemented a **custom hook** to fetch the data easily for all the components.
- Achieved an SEO score of 100.

Metaversus | Live | *NextJS, Framer Motion, TailwindCSS*

- Developed a site for Metaverse.
- Implemented several smooth animations to give an overall smooth experience for the user.
- Learnt the application of Framer Motion through this project.

Technical Skills

Languages: TypeScript, JavaScript, C++, HTML/CSS

Technologies/Frameworks: NextJS, ReactJS, TailwindCSS, Framer Motion

Developer Tools: VS Code, GitHub, Postman, Docker, MongoDB Atlas, Digital Ocean

Database: PostgreSQL, MongoDB

Education

Sikkim Manipal Institute of Technology

Oct. 2020 – Oct 2024

Bachelor of Science in Computer Science

Rangpo, Sikkim

Leadership

GDSC SMIT

Sept 2022 – July 2023

Web Dev Lead

Sikkim Manipal Institute of Technology

- Took 4 workshops during which students were taught about React and in the end a fully functional project was completed by them.
- Being the lead of the web dev domain motivated my team members to participate in open-source programs.
